# Earth Trek offers up VGA webcam with 2-port USB hub

by **Darren Murph**, posted Nov 29th 2008 at 1:55AM

It's not often that you find a [webcam](#) that's multifaceted, but Earth Trek's webcam is just that. Dubbed the "hottest webcam" this world has ever seen (um, [no](#)), this unit packs a 1.3-megapixel camera, VGA capture abilities, auto focus / auto brightness and the real kicker, a 2-port USB hub. Probably still a ripoff at \$45, but if you need those extra peripheral ports bad enough, who knows what you'd be willing to do.

"...if you need those extra peripheral ports bad enough, who knows what you'd be willing to do."  
  
Well, I'd probably buy a ~\$15 4 port USB hub.

**Skyride** @ Nov 29th 2008 8:34AM Neutral + - !  
Or a PCI USB card and do away with the hassle of bottlenecking a single USB port?  
  
Either way, this is a stupid idea.

**Zana** @ Nov 29th 2008 3:56AM Neutral + - !  
interesting....
